Lumora Analytics - Company Profile

Who we are

Lumora Analytics is a fictional software company created as demo data for this project. Lumora builds an AI-powered demand-forecasting platform that helps mid-sized retailers and grocery chains predict sales, plan inventory and cut food waste.

Mission

Our mission is to make enterprise-grade forecasting affordable for every retailer, so shelves stay stocked and less food is thrown away.

History and milestones

Lumora was founded in 2019 in Austin, Texas by Dr. Maya Chen and Omar Siddiqui. The first product, Lumora Forecast, launched in 2020 with three pilot customers. In 2022 the company raised a 12 million dollar Series A led by Northfield Ventures. In 2023 Lumora opened its second engineering office in Toronto, and in 2024 it passed 150 retail customers across North America.

Leadership team

Dr. Maya Chen is Chief Executive Officer and previously led forecasting research at a national grocery chain. Omar Siddiqui is Chief Technology Officer and an expert in large-scale data platforms. Priya Natarajan is Head of Customer Success, and Daniel Brooks is Chief Financial Officer.

Products and services

Lumora Forecast

Lumora Forecast predicts daily demand for every product in every store up to 90 days ahead. It combines point-of-sale history with weather, holidays, local events and promotions. Customers typically see forecast error fall by 20 to 30 percent compared with spreadsheet methods.

Lumora Replenish

Lumora Replenish turns forecasts into automatic purchase orders, respecting shelf space, supplier lead times and minimum order quantities.

Lumora Insights

Lumora Insights is a dashboard that explains forecasts in plain language, highlights waste hot-spots and tracks promotion performance.

Implementation and support

A standard implementation takes six to eight weeks. Every customer receives a dedicated success manager, 24/7 technical support and quarterly business reviews.

Pricing, security and contact

Pricing

Lumora is sold as a yearly subscription priced per store. The Starter plan costs 199 dollars per store per month and includes Forecast and Insights. The Growth plan costs 349 dollars per store per month and adds Replenish. Enterprise pricing is available for chains with more than 500 stores. A free 30-day pilot is offered for up to five stores.

Security and compliance

Lumora is SOC 2 Type II certified. Customer data is encrypted in transit and at rest, hosted on AWS in the United States and Canada, and never used to train models for other customers.

Customers

Lumora serves more than 150 retailers, including regional grocery chains, pharmacies and convenience-store networks.
